## I Request these Federal matters be raised by National Party Leader in Parliament on my behalf!

---

**gary looney <garylooney@gmail.com>**

**Fri, Nov 14, 2008**

To: W.Truss.MP@aph.gov.au, murraydarling@parliament.nsw.gov.au, Sue.Sulicich@aph.gov.au

Mr. John Williams and Mr. Warren Truss

After spending some time in your Broken Hill office over the 11th-12th Nov 08, Sue Sulicich has shown better understanding and comprehension skills in relation to my concerns than any other person has in Government to date!

I ask that the federal matters on my website [www.broadband.notice.com.au](http://www.broadband.notice.com.au) and my request for the removal of resultant disadvantage to start my online business be raised by the National Party Leader in Parliament on my behalf!

I have disconnected the water from my farming venture and call on the Government to practice what it preaches by fulfilling my simple request so I can move from water reliant to internet reliant IT Business!

Hopefully you understand the significance of how internet can offer alternative income, accordingly Government revenue in high liability low return areas affected by our present and future water limitations!

I see this also as a test of the practical value of you and your office to stand up for our outback community when needed, please just a yes or no to my request by next week so we know if you have what it takes or are controlled by the major parties!

Please read carefully as my substantiated claims are very serious and need your help!

Please could you also provide details of any persons claiming I have lied so that I, in fairness have a right of reply to such claimants and your self's before any false assumptions might occur!

I stand by what I say with honesty and pride!

I have provided evidence to the ACCC, Liberal and Labor party showing in detail how Telstra with the help of the TIO has covered up there immoral actions against me, this is in black and white to the extent that within their own submission material and assessment of, there are serious contradictions suggesting even to a layman with average comprehension skills that these organisation worked together to achieve a pro-Telstra response and hide liability! Complexly altering the facts that were in breach of the Trade Practices Act and failing acceptable moral standards.

Accordingly the TIO's findings are knowingly based on lies and manipulation showing what we in the real-world have known all along, that the TIO is not independent of Telstra (being their initial founder with Optus) nor is the TIO non-bias, fair or credible and accordingly neither can their judgement be!

The ACCC assessment of my case is also erroneous as it did not recognise the facts I state above and there-for is based on a premise that Telstra and the TIO have behaved in a fair, acceptable manner! Additionally their written assessment has errors of comprehension

which contradict easily recognised facts when referenced against available provided information; accordingly the pro-Telstra/TIO assessment findings of the ACCC cannot be accurate or treated as credible!

Telstra cannot be Trusted to treat me fairly as shown, nor could it be expected of me to Trust Telstra in any future dealings and because of this I have been disadvantaged for over two years going without phone or Internet, Telstra owns the only infrastructure in our exchange and copper connection would be the only viable option in both price and bandwidth to start a business I had planned in 2006 to move from my then water reliant agriculture for a sustainable future income!

Please do not just redirect this letter to Labor or Liberal party offices, they have shown disregard and contempt for my request and choose to base their replies on false pretences described above regardless of my stated position which is in a show of arrogance, self-righteousness and in contempt of me, totally disrespecting my honesty and intellect in this regard! Indeed in disrespect of their own intellect to give such a miscomprehending reply!

I understand exactly what I have asked of Government with good reason and grounds for doing so!

The website I supply you with was also supplied to the ACCC (See ACCC assessment) as well as Liberal and Labor party with numerous letters; I have maintained honesty even in light of immoral acts by others!

[www.broadband.notice.com.au](http://www.broadband.notice.com.au)

I stand by my information, on the front HTML of my website you will read of my experience and request for help of Government, PDF documents available from links on this HTML provide documentary evidence that has been scanned with Character Recognition meaning the site is smaller (more affordable) and searchable!

I ask specifically if you will stand-up in question time and raise my request transparently with the parliament adding in such a speech that I want assurance for myself and my country that Government:

- 1) Understands my details fully!
- 2) Can fulfil my request!
- 3) Can protect me against further disadvantage and standover tactics used by Telstra or other parties on behalf of Telstra!

Failing the above request I will never be able to consciously hold an account with this company and with such disadvantage comes resultant society burden through my-self and others put in such position into the future.

Regards

Gary Looney

**I received this reply on Mon Nov 17, 2008**

Mr Looney,

Thank you for your email with regard to your issues with Telstra.

I note that as you have already forwarded your information onto Federal Nationals Leader Warren Truss for action. As this is an issue that falls within the Federal jurisdiction, I recommend you await a response from Mr Truss.

Regards,

John Williams, MP  
Member for Murray-Darling

-----

Dear Mr. Williams

Latter components of this issue are now Federal matters, only because of the hole dug by Government in covering up the original underlying issues which was initially also covered up by the TIO ETC, you get the picture.

I am a disadvantaged, personally effected citizen in your electorate and to the end of resolving this component this is very much not a federal matter but local, effecting my ability to make a living and your states revenue, I call on you to represent me and resolve the disadvantage promptly for me to commence my business and make a living.

Liability or responsibility are of no interest to me from the prospective of removing my disadvantage, however it is blatantly clear that no parties can be trusted to represent the interest of there citizens when it comes to serious matters and if you also fall under that category then the electorate will be Informed.

I have given some ground by including the words "Federal Matters" in my previous letter after your office believed some matters were in a previous discussion, do not play this, please fulfill your role and obligation to represent my personal disadvantage matters!

CALL WAITING FOR LOCAL MP

Broken Hill and Menindee were founded on mining and water respectively, sustainable income that includes Technology, Arts and Internet based business should be encouraged!  
My plan was to move from water reliant agriculture to an Internet business.

I have raised a problem through the office of Mr. John Williams and National's Leader Mr. Warren Truss, directing both to a website for their reference:

www.broadband.notice.com.au

I described unfair treatment by a Telecommunications Company that denied liability for resultant disadvantage caused, leaving me powerless to have the truth acknowledged. Initially I thought the company would apologise unreservedly with admission of error and compensate my loss, but found instead the response was to fight virulently with denial.

The average person is no match for the legal resources and assumption of credibility such Companies have. I disconnected all services in 2006 having no phone or Internet since!

I doubt being the only one with general ideas to contribute for business diversity "given credibility" and call on Government Parties for better representation!  
The average person may not solve the finance crisis but can start a business with impediment and disadvantage issues resolved!

Health merger thorough disaster

(To the editor)

Sir, It is time Claire Blizard and the State Government admitted the merger of the Far West Area Health Service with Dubbo to form the Greater Western Area Health Service was a complete and utter failure.

I remind Ms Blizard of the protests and marches held in Broken Hill opposing the merger.

This merger was meant to save a fortune, but has only cost our city medical services and jobs.

The merger has made it more difficult for health staff in Broken Hill to do their job effectively.

The Broken Hill health services are suffering because of poor administration in Dubbo, a city 800km away.

There has been mention of a merger with Sydney. This will mean a further degradation of services and reduction in the workforce in Broken Hill.

Not only should this merger not go ahead, but it is time control of Broken Hill Base Hospital was back in the hands of the Broken Hill community.

It is nothing less than arrogance from the State Government to ignore the wishes of the people who live in Broken Hill.

If there are to be cuts in spending, the State should start at the top, with the people responsible for the blunder which is the Greater Western Area Health Service.

I call on the union to begin organising protests now before we lose fur-

ther control and our health service merges with Sydney.

Yours etc.,

Slide charge over the top

(To the editor)

Sir, I hope a lot of residents get behind the letter writer re: "Charge? Let it slide." (BDT, Nov 13).

A lot of children don't get to go on holiday or movies and other outings.

The facility should be enjoyed by all children after paying the same entry fee as everybody else.

A lot of people would not be able to afford to give their children the extra money to pay for the slide, even if it was 50c.

How cruel indeed to have some children forced to watch others enjoy a facility that should be open for all to use.

I agree this is craziness that needs to be stopped dead in its tracks.

To even suggest a charge for the use of the slide is mean and nasty.

Good on you "Concerned Resident with a family", you are so right.

I for one hope all residents stand up and protest about this disgusting idea.

Yours etc.,  
Another Concerned Resident.
