Services that may be available at your premises

Based on the information you have provided, your premises has been identified as:

Category (A) Providers

Under the Australian Broadband Guarantee, Category A internet service providers provide land-based commercial broadband service(s). You are not eligible for a subsidised Australian Broadband Guarantee broadband service.

The registered providers listed below may be able to offer a metro-comparable broadband service at your premises.

If you can print this page, we encourage you to do so and contact the listed ISPs to investigate their service availability at your premises. **You should not complete the Australian Broadband Guarantee registration form.**

If more than one ISP is listed, we suggest you shop around and compare what each ISP offers before selecting the service that best meets your needs.
